ROHITH E

SOFTWARE DEVELOPER

Namakkal, Tamil Nadu, India | +91 96554 83130 | e.rohit3130@gmail.com
github.com/ROHITHELAYARAJA | linkedin.com/in/rohith-elayaraja | leetcode.com/Shinchan_2007 | rohith-digital-x-xi.vercel.app

SUMMARY

Third-year B.E. Artificial Intelligence & Data Science student focused on backend and full-stack software development. Built and deployed applications with Java, Spring Boot, React, TypeScript, SQL, and AWS, including client websites, an engineering learning platform, and an AI study assistant. A website delivered for Cake Lover Namakkal was followed by approximately 30% reported revenue growth. Strong foundation in DSA, OOP, DBMS, Operating Systems, and Computer Networks.

EDUCATION

VSB Engineering College, Karur | B.E. Artificial Intelligence & Data Science | **2024 - 2028**
CGPA: 8.00 / 10 | Coursework: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

TECHNICAL SKILLS

- **Languages:** Java, Python, JavaScript, TypeScript, SQL
- **Backend:** Spring Boot (REST APIs, JDBC)
- **DevOps & Cloud:** Docker, GitHub Actions, Linux, AWS, Vercel
- **Frontend:** HTML, CSS, React
- **Databases:** MySQL, PostgreSQL, Supabase, Firebase
- **Testing & API Tools:** Postman, JUnit, Jasmine

EXPERIENCE

Freelance Software Developer - Rohith Digital X | Aug 2026 - Present

- Delivered 3 production websites for a local business, a digital marketing agency, and my own software portfolio, handling requirements, development, testing, deployment, and revisions.
- Built Cake Lover Namakkal's website to make products and ordering information easier to find; the client reported approximately 30% revenue growth after launch.
- Designed and launched the Anis Creation website for a Madurai digital marketing agency, with responsive service pages and clear contact and enquiry paths.

PROJECTS

Virtual Labs - Engineering Learning Platform
Next.js | TypeScript | Spring Boot | Supabase | PostgreSQL
GitHub: github.com/ROHITHELAYARAJA/Virtual-Labs

- Built a browser-based engineering lab platform for approximately 500-600 students across 4 academic years, covering 12 lab modules with simulations, quizzes, learning resources, progress tracking, and Supabase/PostgreSQL storage.
- Created a 4-part experiment flow - theory/video, interactive simulation, JVM tracing, and challenge/quiz - and connected the interface to Spring Boot REST APIs.

Blast AI - Student AI Assistant
React | TypeScript | AWS | AI Model Integration
GitHub: github.com/ROHITHELAYARAJA/Student-AI-Assistant

- Built an AI study workspace that accepts searchable PDFs up to 10 MB / 80 pages, plus TXT and Markdown, and turns source material into notes, flashcards, quizzes, explanations, and document-aware tutoring.
- Added integration tests with a temporary database and mocked AI responses, then deployed the application on AWS while keeping model credentials on the backend.

Bank Management System
Java | JDBC | MySQL | BCrypt
GitHub: github.com/ROHITHELAYARAJA/Bank-Management-System

- Implemented 7 banking operations - account creation, login, deposits, withdrawals, balance checks, transfers, and account deletion - using a UI-Service-DAO structure.
- Used JDBC transactions with commit/rollback, PreparedStatement, and BCrypt to protect data and apply different rules for Savings and Current accounts.

OPEN SOURCE CONTRIBUTIONS

Open Source Contributor - AbacusAI Bot
GitHub: github.com/abacusai/abacusai-bot

- Fixed a Windows 8.3 temp-path bug in the agent guardrails that blocked valid scratch-file writes.
- Added Windows regression tests for scratch-path handling; the fix was reviewed and merged upstream in PR #70.

ACHIEVEMENTS & CERTIFICATIONS

- Solved 315+ Data Structures and Algorithms problems on LeetCode and regularly participated in programming contests.
- AWS Certified Cloud Practitioner
- Google AI Professional Certificate
- HackerRank SQL Intermediate / Gold Achievement - 2026
